PATENT COOPERATION TREATY PCT

REC'D 19 JUL 2005

INTERNATIONAL PRELIMINARY REPORT ON PATENTARY PROPERTY.

PCT

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference 542430C	FOR FURTHER ACTION	See Form PCT/IPEA/416				
International application No.	International filing date (day)					
PCT/AU2004/001073	12 August 2004	12 August 2003				
International Patent Classification (IPC) or	national classification and IPC					
Int. Cl. ⁷ A61M 1/12						
Applicant HEART ASSIST TECHNOLOG	SIES PTY LTD et al					
1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.						
2. This REPORT consists of a total of 4	sheets, including this cover sh	eet.				
3. This report is also accompanied by ANNEXES, comprising:						
a. (sent to the applicant and to th	e International Bureau) a total	of sheets, as follows:				
sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).						
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.						
b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)), containing a sequence listing and/or table related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).						
4. This report contains indications relating	ng to the following items:					
X Box No. I Basis of the repo	ort	·				
Box No. II Priority		•				
Box No. III Non-establishm	Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability					
Box No. IV Lack of unity of	Box No. IV Lack of unity of invention					
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement						
Box No. VI Certain documents cited						
Box No. VII Certain defects	Box No. VII Certain defects in the international application					
Box No. VIII Certain observa	Box No. VIII Certain observations on the international application					
Date of submission of the demand	Date	of completion of the report				
10 March 2005	•	11 July 2005				
Name and mailing address of the IPEA/AU	Autho	orized Officer

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Claims

International application No.

NO

PCT/AU2004/001073

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement	Statement						
Novelty (N)	Claims 6-22	YES					
	Claims 1-5	NO					
Inventive step (IS)	Claims 6-22	YES					
	Claims 1-5	NO					
Industrial applicat	oility (IA) Claims 1-22	YES					

2. Citations and explanations (Rule 70.7)

NOVELTY (N) AND INVENTIVE STEP (IS) Claims 6-22:

None of the citations listed in the ISR discloses a method of treating a failing heart/an implantable direct cardiac compression system including a left implantable direct cardiac compression device and a right implantable direct cardiac compression device, each said device having a body with a flexible frontal compression wall adapted to be affixed to a corresponding ventricle and to compress the ventricle upon pressurisation and a rear wall stiffer than the compression wall, wherein

either the body of the left implantable direct cardiac compression device has two flexible flaps extending from a respective lateral side of the body

or the body of the right implantable direct cardiac compression device has at least one strap extending from a respective lateral side

to secure the respective device to the corresponding ventricle.

Hence the invention claimed in claims 6-22 is considered to be novel and involves an inventive step.

NOVELTY (N) claims 1-5:

Claims 1,2:

- (a) WO 199855165 A (WOODARD et al)
- (b) WO 200036995 A (CORSET INC)
- (c) US 5800334 A (WILK)

Each of these citations (a)-(c) discloses an implantable cardiac compression device having a pressurisable chamber formed of a flexible front wall and a rear wall, two flexible flaps extending from the lateral sides, the front wall and the flaps have a surface layer formed of a biointegratable material as claimed in claims 1,2. See for example in citation (a): page 40, lines 14-27, figures 11,12,14.

Claims 3-5:

Each of the citations (a) and (b) discloses the additional features of claims 3-5. See for example in citation (a): page 40, line 14-page 42, line 2, figures 11, 12, 14.

Hence the invention claimed in claims 1-5 is not considered to be novel.

INVENTIVE STEP (IS) claims 1-5:

Claims 1-5 as above

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/AU2004/001073

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Independent claims 1, 6, 9 and 18 do not define the invention because these claims do not define all the essential features of the invention.

Claim 1 defines only one implantable direct cardiac compression device with two flexible flaps.

Claim 6 defines two implantable direct cardiac compression devices where one of the devices has two flexible flaps. Claims 9 and 18 define two implantable direct cardiac compression devices where one of the devices has at least one strap.

It appears that the invention is directed to the features of claims 6 and 9 or claims 6 and 18.
